Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-54 are presented for examination.

Applicants' amendment and terminal disclaimer filed November 11, 2004 have been received and entered.

Accordingly, the rejection made under obviousness-type double patenting as set forth in the Office action dated August 9, 2004 is hereby removed.

Allowable Subject Matter

Claims 1-8 are allowable.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-54 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for proline and glutamine, does not reasonably provide enablement for any composition formulation additive. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

Applicants provide support for the addition of proline and glutamine to riboflavin and/or riboflavin derivatives (see column 2, lines 25-35). However, the

Art Unit: 1614

instant claims necessitated any "composition formulation additive" which includes proline, glutamine and a plethora of other additives. In other words, the "composition formulation additive" includes a wide spectrum of additives and is not limited to only proline and glutamine, which the specification provides support for.

Claims 9-54 are not allowed.
